

LORANN Flavourings

KEY

	Would appear to be the best for vaping
	On the face of it, OK, but only concern is that the flavouring may contain Diacetyl – a flavouring used to create a butter flavour which is dangerous when inhaled and causes ‘popcorn lung’ disease
	May not be so good for vaping: includes artificial colourings or some such thing
	Wouldn't be ideal for vaping – eg not water soluble, contains oil etc
